(Raspberry Pi + EMG sensor test)

(research abt fatigue point.)

← end of semester.

risk
• sensor might not work.
• unable to show parameter in Rasp.pi OS.

risk
• Too many factors for determining fatigue points.

Visualizing sensor results
+
additional sensor.

circuits

risk
:

Coding

← end of Summer ?

Design. (probably PCB designs)

(bluetooth ?)

Muscle

EMG sensor

sensor

Visualizer data + sensor results

EMG sensor + sensor neuro

Raspberry Pi

Give Bare Hat

Raspberry Pi

User

EMG signals

(simplify PCB design)

(bluetooth?)
